

UV/LED LAMP RECHARGEABLE LAMP UV/LED S10

- User manual

Technical data:

Power supply:
nominal input: 220V
rated output: 12.6V 1A
Power: 48W
Battery capacity: 3x3200ma
Built-in battery life: 800-1000 charges
Charging time: 2h
Continuous operation time: 2h
Number of UV LEDs: 30 pcs.
UV wavelength: 365+405nm
Model: S10
Certificate no: EZT20191016135E
Cures hybrids/UV/LED gels.

Parts instruction:

1. Infrared Induction
2. LED Screen
3. 10s Timer Touch Key
4. 30s Timer Touch Key
5. 60s Timer Touch Key
6. 60s timer with High Heat mode
7. 99s timer with low heat mode
8. Power connector
9. Lamp switch

User Manual:

1. Connect the lamp to the power supply. If the power indicator is red, it announces that the lamp is charging. The four blue indicators show the charging status of the lamp. If the blue indicator lights up and does not blink after a 2-hour charge, the battery has been fully charged.
2. Charging time of 2h is enough for 2h of operation of the device. The device can be used while charging.
3. Turn on the lamp with the switch. To start the illumination, press the timer button - you can select one of the available timer options 10s/30s/60s/60s(High Heat mode)/99s(Low Heat mode), or start without selecting a time. To do this, insert your hand into the device, and the illumination will start automatically when the sensor detects movement(the illumination limit is 99s).
4. The display shows the remaining exposure time. When using the 10s/30s/60s timer, it counts down. When using the 99s timer and activating the device with the motion sensor, the device counts up.
5. The High Heat mode can be used with products that are difficult to cure.
6. If the lamp is not used for at least 10 minutes, the lamp goes into sleep and battery protection mode. The display stops showing the time. To turn off the sleep mode, press the 99s timer button.
7. Follow the curing instructions of the product used.
8. When you have finished using the lamp, turn it off and unplug it from the mains.

Warnings:

- The lamp should be operated only from an appropriate power source.
- Protect the unit from dust, water and other liquids.
- Unplug the lamp from the power source when the lamp is not in use or there is a need to clean it.

Do not use the lamp:

- In humid areas.
 - If the power adapter is damaged.
 - If the unit or the connecting cable is damaged.
 - If the timer buttons do not work.
-
- The device should not be left running for more than 600s, as this may reduce its service life. The device is designed for indoor use.
 - Making independent switches and changes to the device is prohibited.
 - Opening the device is categorically prohibited and equivalent to loss of warranty, and the manufacturer assumes no responsibility for the correct and safe operation of the device.
 - Do not stare directly into the UV light, which can cause eye damage. The lamp uses UV/LEDs, which emit dangerous UV rays. These can also cause damage to the skin. Your skin may be more sensitive to UV rays when taking medications or using cosmetics. If you notice sudden changes on your skin, seek medical advice immediately.
 - Slight heating may occur while the device is charging.
 - If the device is not used for a long time, charge it at least once every 3 months.
 - If the device does not fully charge for a long time, unplug it immediately.
 - If electrolytes escape from the device, immediately wash the soiled areas with plenty of water and protect them.
 - Do not charge the lamp when it is not under supervision. When walking away from the lamp, unplug it from the power supply.
 - **KEEP OUT OF REACH OF CHILDREN.**
